

Pressure Equipment & Material Technology

ECE Global provides the engineering experience as well as inspection and certification services necessary to provide plant operators with assurance of an ongoing safety of existing pressure equipment.

We work with our clients to provide Technical Reviews to confirm that sound engineering practices are applied according to application requirements and commissioning compliance has been achieved.

CE Marking and hence compliance / certification according to European requirements are part of our portfolio.

Our passion for and expertise with national and international industrial applications allow us to adapt with evolving needs.

Let us earn your trust.
Thank you!

ECE Global

Your Global Partner in Engineering, Quality and Safety Compliance
Design - Fabrication - Inspection - Certification

CE Marking

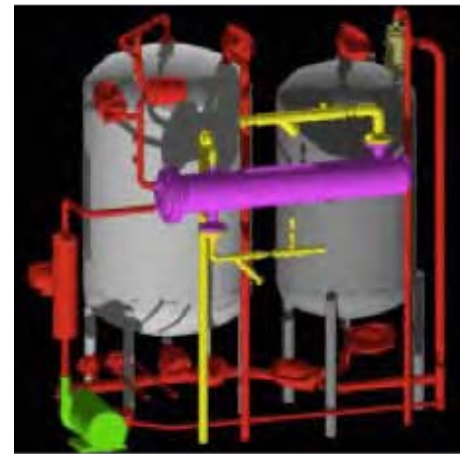

(European Directives)

Machinery
Pressure Vessel
Simple Pressure Vessel (Nitrogen or Air)
Heat Exchanger
Autoclaves
Valves (Safety or Pressure Accessories)
Material Compliance and Approvals
Welding Procedure and Welder /
Operator Certification
Skids & Modules
Quality Assurance Systems
Documentation and Technical
Compliance File (TCF)
One-Time (Individual) Product Approvals
Serial Production Certifications
Acceptance by Notified Bodies with
Positive Certification Outcome

Pi Marking

(Transportable Pressure Equipment)

Gas Cylinder
Aerosol Cylinder
Valves (for Safety or Operations)
Safety Devices
Material Compliance and Approvals
Welding Procedure and Welder
(Operator) Certification
Quality Assurance Systems
Documentation and Technical
Compliance File (TCF)
Serial Production Certifications
Acceptance by Notified Bodies
with Positive Guaranteed
Certification Outcome

Pressure Equipment

Welding Procedure

Quality Systems

CE Marking
ISO 9000 (Quality Management System;
All Industries)
CFR (cGMP)(Quality Management
System; Biotech / Pharmaceutical
Industries)
EN 15085 (DIN 6700) Welding of Railway
Vehicles and Components
ISO 17025 (Quality Management
System; Laboratory Assessment)
Support with Authorities (National /
International) and Certification Bodies

ECE understands what you expect - flexibility and customized solutions! We can change and adapt with your evolving needs because of the knowledge, experience, and passion of our staff.

ECE Global

Your Global Partner in Engineering, Quality and Safety Compliance
Design - Fabrication - Inspection - Certification

Applications Include:

Pressure Vessels
Boilers
Tanks
Autoclaves
Compressors
Valves
Safety Valves
And more

Pressure Vessels

Our Services Include, but are not limited to:

Certification to European Union Directives (CE / Pi Marking)
Certification to German Laws and Regulations
Type Approvals
Design Approvals
Equipment Production Inspection and Surveillance
Plant Integrity Management
Material Testing Approvals
Welder Qualification and Certification
As-Built Construction Surveillance and Certification
Detailed Design Review of Equipment or Skids and Modules

Additional Services Include:

Risk Based Inspections
Project Management
Process Design
Pressure Vessel Design
Skid and Module Design
Stress Analysis

The industries we serve include:

Petroleum
Chemical

Pressure Equipment
Manufacturing & Assembly

Pharmaceutical
Biotech

Rail & Road Equipment

ECE understands what you expect - flexibility and customized solutions! We can change and adapt with your evolving needs because of the knowledge, experience, and passion of our staff.
